

Business Line Replacement

Replace Your Business Lines with Voice over IP (VoIP) Service and Reduce Your Expenses

Are you looking for ways to reduce voice expenses to meet your business objectives? Voice Over IP (VoIP) is one way you can start lowering your costs by leveraging your Internet connection for your voice services. All you have to do is to replace your existing business lines with Airband's VoIP service. Your current phone system, its features and functionality will remain the same while you enjoy lower monthly service rates.

Immediate Savings: There is no need to upgrade your phone system to realize cost savings. You are simply switching out an expensive voice line with a more economical VoIP service.

More Calling Features Per Line: With Airband's service, you enjoy a standard set of 8 calling features with no additional up-charge. Line features such as speed dial, call forwarding, three-way calling and voice mail are included in one low monthly rate.

Optimize Bandwidth Usage: Airband's VoIP service is provided over our fixed-wireless network with integrated voice and data access. This means your bandwidth can be dynamically allocated between voice and data traffic to help avoid waste.

Easily Scalable: As you add employees, additional lines can be easily provisioned. Airband can also adjust your Internet bandwidth to accommodate your voice requirements on an as needed basis.

The Airband Difference

Airband's VoIP services are delivered over our **Private IP Network** where voice traffic is prioritized to ensure enterprise-class **Quality of Service (QoS)** and the reliability you demand for your mission-critical communications. Unlike consumer-based VoIP offerings, Airband's VoIP services are monitored and managed by our **24x7 support staff** at our Network Operations Center. Additionally, all Airband services are covered by a Unified Service Level Agreement that gives our customers additional peace of mind.
