- Scalable, one employee at a time

IP Trunking

Highly Efficient, Affordable Business-Grade Voice Service

- Replace your existing PRI with VoIP trunking and save immediately on monthly expenses
- Enjoy the service quality of Airband's Private IP network with our VoIP/SIP trunking services
- Buy just what you need - scalable one VoIP/SIP trunk at a time
- Airband's service includes the local loop over our fixed-wireless network

Business VoIP Lines

Replace Your Analog Business Lines with VoIP & Save

- Replace high-cost LEC business lines with lower cost VoIP service
- Keep your phone system and save on monthly expenses
- Integrated VoIP and Internet access simplifies management and billing

The Airband Difference

Airband's VoIP services are delivered over our **Private IP Network** where voice traffic is prioritized to ensure enterprise-class **Quality of Service (QoS)** and the reliability you demand for your mission-critical communications. Unlike consumer-based VoIP offerings, Airband's VoIP services are monitored and managed by our **24x7 support staff** at our Network Operations Center. Additionally, all Airband services are covered by a Unified Service Level Agreement that gives our customers additional peace of mind.

Airband leverages our fixed-wireless network for VoIP services, giving our customers the efficiency of **integrated access**, eliminating the need to maintain separate circuits for voice and data. Integrated access also means our customers can **optimize network utilization** since bandwidth can be **dynamically allocated** between voice and data traffic to help avoid waste. If you're on the phone, you can use all of your allotted bandwidth for data communications, and vice-versa
