

# Fixed Wireless Internet Access

## The Internet access service you will never outgrow

Airband provides all levels of Internet access services for businesses, from small businesses to Fortune 1000 companies. With our fixed wireless technology, Airband literally goes above existing landline networks to deliver Internet access directly to your location. We offer high-bandwidth speeds at affordable rates. And our services are not restricted to T1 or DS3 increments, so you can get just the amount of bandwidth you need.

**2 Mbps to GigE Speed:** With Airband, you can install new service without the hassles and long lead times associated with traditional landline services. Initial installation can take just a matter of days, not weeks or months.

**Lightning Fast Upgrade:** Bandwidth can be easily upgraded within hours with a software change in our network.

**Ethernet Connectivity:** Our service is delivered via an Ethernet connection, making it simple for you to manage and connect to your LAN.

**No Upfront Capital Investment:** There is no upfront equipment cost needed to implement Airband's service and bandwidth upgrades will not require additional equipment charges.

**Reliability You Can Count On:** We deploy eight levels of signal modulation and our radios automatically choose the appropriate level to ensure optimal throughput.

**Secured Transmissions:** Our wireless hardware utilizes 128 bit Advanced Encryption Standard (AES) to protect your data.

**Reliability You Can Count On:** With our Dual Path Service Deployment option, we can back-up your wireless connection with a wired or wireless circuit and manage failover for maximum reliability.

**100% Uptime Guarantee:** We're the only service provider in the industry that has service level guarantees on jitter, in addition to latency and packet loss.

## KEY BENEFITS

- Scalable bandwidth on demand
- Installation in days
- Ethernet service
- Secure and reliable
- 100% uptime guarantee

## Point-to-Multipoint Deployment
