

# The Voice Over IP Advantage

## Replace Your Business Lines with Voice over IP (VoIP) Service and Reduce Your Expenses

Are you looking for ways to reduce voice expenses to meet your business objectives? Voice Over IP (VoIP) is one way you can start lowering your costs by leveraging your Internet connection for your voice services. All you have to do is to replace your existing analog lines with Airband's VoIP lines. Your current phone system, its features and functionality will remain the same while you enjoy lower monthly service rates.

**No Upfront Capital Cost:** There is no need to upgrade your phone system to realize cost savings. You are simply switching out an expensive voice line with a more economical VoIP service.

**More Call Features Per Line Without the Up-Charge:** Most local phone company lines offer up to 4 calling features with additional fees. With Airband's service, you enjoy a standard set of 8 calling features with no additional up-charge. Line features such as speed dial, call forwarding, three-way calling and voice mail are included in one low monthly rate.

**Easily Scalable:** As you add employees, additional lines can be easily provisioned. Airband can also adjust your Internet bandwidth to accommodate your voice requirements on an as needed basis.
