

Wholesale: Fixed-Wireless Point-to-Point Service

Affordable, dedicated WiMAX service with unmatched flexibility

Businesses today are increasingly reliant on high-bandwidth connectivity. Whether it's for LAN extensions within an office campus or connecting remote locations, reliable and affordable point-to-point service is mission critical to many organizations.

Airband's Point-to-point offering leverages WiMAX fixed-wireless technology to deliver private line services quickly, even in the most populated metropolitan areas. Like an airplane flying over a crowded freeway, Airband's service bypasses the traffic jams of wireline networks to give customers the dedicated bandwidth they need, over the air.

Scalable Bandwidth up to GigE Speeds: Our service is not bound by T1 or DS3 increments, so your customers can have just the bandwidth they need, from 45 Mbps up to GigE speeds.

Network Connection up to 20 miles: Our fixed-wireless radios can broadcast signals up to 20 miles, if line-of-sight is clear.

Fast Installation and Delivery: Depending on bandwidth and distance, service can be up and running in a couple of weeks, no waiting for months to turn up the circuit.

Ethernet Service: Our data service is delivered via an Ethernet connection, making it easy to configure and less expensive to implement. TDM handoff is also available.

Fully Managed: Whether the service is deployed in the licensed or license-exempt spectrum, Airband provides turn-key service from obtaining the license to the ongoing monitoring and managing the circuit.

Secured Transmissions: Our wireless hardware utilizes 128-bit Advanced Encryption Standard (AES) to protect end-user data.

100% Uptime Guarantee: We're the only fixed-wireless provider in the industry that has service level guarantees on jitter, in addition to latency and packet loss.

Single Point of Contact: Airband operates and manages our wholly-owned network, so you can expect to work with the most responsive service team in the industry.

KEY BENEFITS

- Available in all Airband markets
- Ethernet connectivity
- Turn-key delivery
- Fully managed
- 24x7 monitoring and support
- 100% uptime guarantee

Point-to-Point Deployment
